SUMMARY:

Cyber Security Analyst with hands-on experience in mobile application security, user data protection, and policy enforcement, including risk assessment, **compliance review, and developer appeal handling**. Proven **ability to collaborate cross-functionally** to resolve complex data safety issues and **support secure product ecosystems**. Currently **expanding expertise in cloud computing** and cloud security, with strong eagerness to deepen technical skills and **contribute to organizational security maturity and long-term company advancement.**

WORK EXPERIENCE:

Cybersecurity Analyst

Accenture   *November 2022 – Present*

- **Conducted comprehensive security, privacy, and user data risk assessments on mobile applications**, analyzing data collection, storage, transmission, permissions, SDKs, and third-party integrations to ensure compliance with client's user data protection policies.
- **Made risk-based enforcement decisions**, including application approvals or takedowns, by accurately identifying policy violations related to sensitive data exposure, unauthorized access, and non-compliant data handling practices.
- Managed and **reviewed developer appeal cases**, reconfirming enforcement accuracy, validating findings, and providing clear, actionable remediation guidance to help developers resolve security and privacy issues.
- **Collaborated cross-functionally** with client, engineering, legal, policy, trust & safety, and operations teams to address complex data safety issues, escalations, and edge cases impacting user privacy.
- **Maintained detailed case documentation** and audit records, contributed to process improvements, and supported internal teams as a subject matter resource on user data safety and mobile application security policies.

Website Developer Support

Fitgun Global Business   *September 2021 - February 2022*
